

Design and construction of a mock-rover. The goal of this project is delivering a functioning mock rover. We define RITRochester Institute of Technology SPEXRIT Space Exploration PDDProject Design Document URCUniversity Introduction

Robotics and by extension rovers are a tremendously important part of space exploration. This is also an area that Primary Objective The goal of this project is delivering a functioning mock rover. We define mock rover as a function Minimum Viable Product The minimum viable product (MVP) has been defined by the basics of what can be called
